RENAL HEALTHCARE | HIE FOR EQRS

MANAGED BY OneHealthPort HIE

Background:

In an effort to assist organizations in correcting errors encountered in the electronic data submission of EQRS (formerly CROWNWeb) quality data, EQRS has prepared various data quality improvement reports designed to:

- Provide specific information for data submitters to correct errors encountered and identify other potential issues from the quality data report submission process.
- Provide detailed information, not available in the Deferred Response, so that over time the data quality and ease of submissions to EQRS can be improved.

These reports are prepared by EQRS and sent to the Renal Healthcare (formerly NRAA) HIE for distribution to submitting entities or individuals responsible for data submissions. The reports address various data issues and will change over time as needed to help improve the quality of the data submissions.

EQRS Data Quality Improvement Report Distribution Process:

The EQRS data quality improvement reports are distributed to all Renal Healthcare HIE entities responsible for submitting quality data to EQRS. The Renal Healthcare HIE entities (or individuals) managing the data submission process will receive the data for all the facilities for which they are submitting. The entities or individuals are responsible for:

1. Taking action on the data supplied in the reports, or
2. Further distribution to individual facilities that need to take action on the information provided in the reports.

PROTECTED INFORMATION WARNING:

The EQRS data quality improvement reports contain analysis information provided by EQRS for the Renal Healthcare HIE facility that submitted the data. The information in the **report may contain personally identifiable information (PII), protected health information (PHI) or personal health record information (PHR). You are required to keep this information and/or clinical data, secure and protected at all times. You are responsible to ensure that the PII/PHI/PHR under your care and control is not disclosed to any unauthorized entities. This includes, but is not limited to, a PII/PHI breach or compromise resulting from misuse or abuse, intentional or unintentional.**

EQRS Quality Data Improvement Information

Version	Date	Document Update	Prepared by	Approved by
1.0	11/4/2019	Initial draft	OneHealthPort HIE	Karena Sullivan
2.0	2/12/2021	Updated with references to EQRS and Renal Healthcare HIE	Kelly Llewellyn	Karena Sullivan
3.0	3/10/2022	Updated to reflect new report data columns	Kelly Llewellyn	Karena Farnham

REPORT NAME: UNOS Report

Report Description:

The purpose of the UNOS Report is to provide a listing for EDIs about patients in-scope that are included in the Transplant Wait List feed from UNOS.

Report Layout:

The first row of the report is the report header and contains the following information:

HDR	DOCUMENT TYPE	REPORT NAME	LINK FOR REPORT GUIDE ON RENAL HEALTHCARE HIE WEBSITE	RECORD COUNT	DATE REPORT DISTRIBUTED BY THE RENAL HEALTHCARE HIE

Example:

HDR	NRAA_REPORT	UNOS	https://renalhealthcare.onehealthport.com/sites/nraa/files/content-uploads/documents/UNOS_Report_2022.pdf	7	20220310

The second row of the report is the column headers that describe the data content of the report. The report contains the following column headers:

Column Header Field	Description
BSO_NAME	Name of EDI Submitting Organization
ORG_FACILITY_ID	EDI submitter's Facility Identification Number
org_asctn_name_1	Primary owner as reported in EQRS
edi_ptnt_id	EDI unique patient ID
ptnt_id	EQRS patient identification number
org_id	EQRS facility identification number
network	Corresponding Network Number for Listing
admsn_dt	Patients most recent open admission date
lstg_dt	Date transplant center listed patient
lstg_cntr_cd	Listing transplant center identification Code
center_name	Listing transplant center name
center_phone	Listing transplant center phone number
rmvd_dt	Removed from Transplant Waitlist Date
rmvd_cd	Waitlist removal code
unos_waitg_lst_rmvd_cd_type_desc	Waitlist removal description
sys_creat_time	Date record was recreated in EQRS
sys_updt_time	Date EQRS last updated Record
unos_candt_stus_cd	Waitlist candidate status code
unos_candt_stus_dt	Waitlist candidate status date
unos_candt_stus_desc	Waitlist candidate status description
unos_waitg_lst_orgn_cd	Waitlisted organ code

unos_waitg_lst_orgn_type_desc	Waitlisted organ description
run_dt	Run date
actv_flag_txt	Active indicator flag

Actions Required:

1. Review the details of patients listed on the UNOS report.
